Your plywood can do so much more for you

By repairing your plywood formwork you can re-use it many more times

Emplica's history goes back to 1996, when the owner first started to develop the plywood repair system. In 2010, emplica was founded with the goal to provide the best possible plywood repair system and service. Today, emplica is a leader in innovation and quality.

Using Finnish and Russian birch plywood, emplica produces millions of repair plugs and strips on state-of-the-art equipment in factories in southern Germany.

Efficient

Emplica offers the highest possible quality products to restore your valuable plywood forms for many more pours. Not only can you cut costs by repairing, you also save time.

Fast

Field-testing has revealed that the application of a repair plugs takes less than a third of the time than the application of filler-materials.

Green

Not only is the emplica repair system faster than filler, it is also greener. Our raw material comes from regulated FSC forests.

Innovative

Since its inception, emplica has been focusing on engineering and R&D. We successfully aim to offer one new product per year that will make your life easier.

Safe

All emplica router bits comply with EN 847 safety standards. All tools are made in Europe.

Extend the life of your formwork. With emplica repair systems you can boost the number of operations by up to 25 per cent. Emplica repair solutions provide a durable and ideal renewal of your valuable plywood formwork.
